

Threading

Threading has been around for much longer than the treatment's recent rise would have you think. It's a technique that has been used in Asia for centuries to remove unwanted hairs. Neelu was the first person to introduce the threading technique to Ireland. Threading is an ancient Indian way of removing hair. Threading involves knotting and twisting a fine cotton thread around hair to essentially take it from the pore. Neelu works to design and shape a flawless brow without the pain and skin injury common to other techniques.

Eyebrow Shape €18
Upper Lip €18
Chin €28
Lip & Chin €40
Forehead €30
Sides of the Face €30
Neck €32

Tinting For Eyelashes & Eyebrows

There's a real art to a professional brow or lash tint with Neelu. She can instantly transform lashes or brows into looking much thicker, more youthful and an altogether more polished look.

Eyelash Tint €18
Eyebrow Tint €15
Eyelash + Eyebrow Tint €30

Disposable Waxing

Professional, Hygienic, Disposable waxing system is used at Neelu's. No fear of cross contamination through waxing due to spatula re-dipping in the wax pot or not being able to sterilise the head of the roller waxing. The applicator is new for each client and disposed of after each use.

The applicator has a gate mechanism to prevent the wax from re-entering the tube. The tube is held at a 45° angle in a booster chamber so there is no chance of any flow-back during treatment. It is the safest wax system eliminating the possibilities of cross-contamination (especially in areas prone to bleeding) between clients. The applicator has a gate mechanism to prevent the wax from re-entering the tube. The tube is held at a 45° angle in a booster chamber so there is no chance of any flow-back during treatment. €50

Remedial Treatments Vein Wave

Vein wave treatment is particularly effective in the treatment of thread veins or spider veins, and can also help in cases of rosacea. Veinwave is a minimally invasive procedure shown to be safe and effective in improving the appearance of veins. It involves heating the veins using a tiny needle, which causes the walls of the veins to collapse and eventually disappear. The procedure is quick and relatively painless, with most patients experiencing little to no discomfort.

Vein Wave: Thermo-Coagulation for Red Veins (face & chest)
20 minutes €300
Removal of Skin Tags €175
Removal of Milia (white heads) 20 minutes €175

EpilPro

EpilPro is a sound-wave treatment. It is a unique innovation for permanent hair reduction and it's a superior alternative to conventional electrolysis. Truly non-invasive, pain free & needleless. Safe for diabetics & epileptics. Treats smooth moles. Slower regrowth. Much faster than electrolysis in results. But it is not a permanent removal of facial hair. The hair will grow back

and and back but softer and lighter in colour over period of time. The gap in the regrowth gets bigger and bigger.
Upper Lip €35
Chin €47
Sides of Face €45
Neck €50

Inch Loss

Neelu has two machines to achieve inch loss. Arasys is an earlier developed machine and whilst effective, its not to the same strength as Virtual Gym. Both use pioneering market leading technology, which enables a non-invasive approach to inch loss. This treatment effectively tightening your skin resulting in inch loss as well as smoothing that cellulite.

Toning & Firming with Arasys

Arasys really works for inch loss, muscle building and body toning. Arasys provides unparalleled inch loss, intensive toning, lymphatic drainage and cellulite reduction all in one. Each programme will help to increase your circulation, metabolism and aid inch loss. It is a most safe and comfortable system and is suitable for both men and women. This system also has a diuretic effect by stimulating the removal of waste products. Even someone who exercises regularly can benefit from Arasys treatment as it has the advantage over exercise of being able to exercise lazy muscles, for example the inner thigh. Arasys also achieves a contraction that is far stronger than can be achieved with normal exercise. It may take a client 2-3 hours in the gym to attain the same effect that can be gained in one 20 minute Arasys session.

Per half hour session €100
A course of 10 half hour sessions €900

Virtual Gym

This treatment is –

- Non-Surgical with no-downtime
 - target more than one area at a time
- benefits -
- Detoxification (increased health & reduced hunger.)
 - Reduced cellulite
 - Fitness & energy levels boosted
 - Increased hormonal balance.
 - Skin & Muscle toning

Per session €225
Ten sessions booked and paid for in advance - €2000

Skin Rejuvenation

Neelu is different to most traditional beauty salons. She has been an advocate for non-surgical facial rejuvenation for over thirty eight years.

Neelu works with expensive, scientific based treatment machines that have a transformative approach to restoring youthful vitality to the face without the need for invasive surgery. This approach is becoming more popular as it enhances the skin's texture, tone, and overall appearance without the pulled and unnatural look of fillers and injections.

Neelu has a holistic approach to skincare that goes beyond surface-level beauty and focuses on achieving overall well-being, recognizing the interconnectedness of mind, body, and skin health. In her initial consultation, she talks to her clients about external factors like diet, lifestyle, emotions, and environmental influences that might have an effect on the overall appearance and health of the skin. She offers advice in this regard to support her treatments.

Neelu's treatments ensure that you look more confident and refreshed. Her aim is that her clients true beauty is reflected in the health and vibrancy of their skin.

1. Consultation with deep cleansing, hydrating treatment showing visible differences in the brightness and hydration of the skin. €150

Expert skin consultation with Neelu allows her to give a personalized skincare guidance based on specific skincare concerns, issues and goals. She can optimize product treatment and products and work towards long-lasting, radiant results for a beautiful complexion.

2. Triple Exfoliation and Oxygen rejuvenation infusion. €190
Triple exfoliation combines physical, chemical, and enzymatic methods to remove dead skin cells, unclog pores, and improve skin texture with a soothing spray of hyaluronic with pure oxygen. Oxygen rejuvenation infusion replenishes skin with oxygen for enhanced radiance and vitality.

It is a treatment that everyone should have to deep cleanse and hydrate the skin with a soothing spray of Hyaluronic with pure oxygen. It is the most luxurious, pampering treatment for tired, sluggish skin that needs TLC. €190

3. Medical Microdermabrasion with Cryo-Cool Hammer and Oxygenating Calming Mask €250

It is a resurfacing procedure performed by Neelu, a certified professional. There is no downtime. It is a safe and pain free alternative to laser and chemical peels to repair sun damage. It uses a controlled flow of medical grade

crystals to remove the dead, outermost layer of skin. It reveals the new living cells that are soft, smooth and receptive to nutrients. It is brilliant for treating weather beaten, sun-damaged tough skin OR and deeply congested neglected skin. (Neelu uses disposable microdermabrasion tips and eye shields).

4. Perfector Face Lift treatment with Triple exfoliation and Oxygen infusion €300

This treatment is a cell regeneration treatment from the anti-ageing expert, Neelu. Perfector was invented by the same person who invented the heart device, the pacemaker. It is a structured six stage anti-ageing treatment using special combinations of micro-current, frequency and waveform unique to Perfector. These work on all levels of the skin, soft tissue and muscle fibres, helping to speed up cellular activity, increasing the local metabolism and re-educating the muscle fibres. It shows subtle lifting to the sagging contours and sculpts the face. It detoxes the skin increasing the skin cell energy resulting in healthier, smoother skin and more youthful appearance. It is safe and pain free. No downtime. Course of 12 treatments is recommended as it is the cumulative result that is very visible. It needs to be done once a week for twelve weeks.

Course of 12 sessions €3200

5. RF Collagen Booster treatment €350

This treatment uses radio frequency energy to tighten skin tissue helping to contour and rejuvenate the skin. It has the ability to heat up deeper layers of the skin and underlying tissue causing deep structures in the skin to tighten immediately. It improves the existing collagen production to further tighten the skin resulting in redefining the contours of the face. Blending beauty with science, this unique non-invasive, non-laser therapy delivers a highly effective treatment that tightens the skin tissue- helping to contour and sculpt and rejuvenate the skin. It improves age spots, elasticity, hydration and firmness. Course of 8 treatments is recommended fortnightly.

Add Lumilight €150

Course of 8 sessions €2500

6. iRevive €400

This treatment is the ultimate in repairing ageing skin. It is a neuro frequency technology that signals to cells. Signals spread throughout the skin, muscle and bone structures between cells and within cells, repairing the damaged cells. Ageing is a reduction of signals between cells and also within cells. iRevive increases these signals and turns back the clock. It rejuvenates the delicate tissue under the eyes, lifts sagging muscles and repairs all layers of the skin giving a youthful glow.

Add Lumilight €150

Course of 10 sessions iRevive €3500

7. Micro-Current treatment for Face and Neck €400

This treatment helps to restructure the skin and repair degenerated muscle conditions. It sends mild micro current impulses to the cells of the body to reactivate and stimulate the cells to a healthier state. This biological communication restores the tissue, calms inflammation, eliminates toxins, educates the muscle by tightening, erases fine lines, minimises wrinkles and increases the ATP* production in the cells.

* ATP is effective in providing anti-aging protection, as well as skin-moisturizing and soothing properties. Additionally, as a major energy molecule for all intracellular processes, ATP also plays a major role in skin rejuvenation.

Add on Lumilight €150

Course of 10 sessions €3500

8. Lumilight LED Light Therapy for anti ageing OR for ACNE healing €300

Neelu will carry out a deep exfoliating treatment first. Deep exfoliation yields benefits such as smoother texture, reduced pores, brighter complexion, diminished fine lines, improved product absorption, even skin tone, enhanced circulation, cell renewal, and overall skin health.

LED light therapy uses frequencies and wavelengths from four different visible light spectrums to reach the layer where damaged skin cells lie. The cells are re-energised and repaired. This activity stimulates rapid cellular turnover, smoothing and renewing the skin surface.

The Red light is the longest wave, triggering repair throughout all layers of the skin. It has a positive effect on the production of collagen and elastin, greatly improving hydration, firmness and elasticity of the skin.

The Blue light is the shortest wave used. It reaches down into the skin's pores to regulate and calm the oil glands, improving acne prone skin.

The Green light is a longer wave reaching down to normalize the glands that regulate the colouring of the skin. This effect can decrease dark pigmentation spots, creating an even tone on the surface. It also reduces redness due to chemical irritation.

The Yellow light extends down through the epidermis layer to reach the tiny blood vessels and lymph system. It is known for detoxifying the skin by stimulating blood circulation, thereby increasing the healing and health of skin.

9. Resculpting Lumi-lift & Oxygen Rejuvenation €300

This treatment infusion is a combination of photo-bio-stimulation, impulse micro-currents and ultrasound. It is a revolutionary way of rejuvenating the skin and lifting the sagging muscles. It is performed with two special electrodes that feature an advanced application of Microcurrent and light

energy. This powerful light stimulates the fibroblast cell to produce more collagen. The increased collagen smoothes and softens the appearance of the wrinkles, reduces the size of the pores and improves the skin texture. In the end of the treatment applying the method of ultrasound, the metabolic processes of the skin intensify, the nutrient and oxygen supply of the cells increase. The skin becomes tighter and youthfully elastic.

At Neelu's we use disposable sheets, disposable towels, disposable headbands and disposable mittens for all our skin treatments to prevent any cross contamination.

Hands and Feet

Neelu does not just do superficial manicures. All of her hand treatments are bespoke, scientific and evidence-based to achieve impressive results based on your individual concerns. Her treatments will improve the appearance of the skin on your hands by rejuvenating the texture and evening out skin tone. Hands are usually a sign of one's true age. The hands are often neglected and as such end up looking dry, crepey and wrinkled. Because of the fat loss the veins look prominent and sunspots make your hands look older.

But microdermabrasion, LED light, RF and Perfector microcurrent applications can resolve all the above mentioned issues. After a consultation, a treatment plan will be agreed and performed. The price will vary depending on the concerns to treat. From €100.00 The treatment will include nail work but no colour. Duration 1hr.30mins.

Basic manicure €35

Deluxe Manicure with exfoliation, massage and collagen mask. €65

Paraffin Wax treatment add on €25

It brings you fast and effective heat therapy for blissful, soothing relief from arthritis, bursitis, tendinitis and strain. This add-on is for working hands that need TLC.

Basic Pedicure €50

Luxury Pedicure with exfoliation and moisturising mask, massage and paraffin wax dip with luxurious heat therapy €95
